## COMPANY PROFILE

We at Naman Enterprises (“NAMAN”) have spent 11 years in the field of Data Digitization (through Paper Scanning and / or Data Entry using customized Data Entry Software) and Data Mining. Our restricted focus on above Services has helped us to create an edge over the subject by developing specialized and customized processes to meet our customers’ expectations.

Following are few points which throw light on need of Digitization.

- Comprehensive use of information technology has raised expectations of customers
- Government’s thrust to implement various compliances to regulate business
- To increase employee productivity for improving services at reduced cost
- Real Estate Problem owing to lack of space for managing voluminous documents.
- Lack of facility with respect to document access at multiple location simultaneously.
- Problem arising from tampering of document by time wrought decay, manual involvement & destruction by termites, fire etc.

As an Information Technology Firm, we have understood market trends and problem areas of most of the organization and has created niche in specific functional areas like Data Digitization and allied services. The various related Services offered by us includes

- Document Scanning : This includes scanning of A4-A3 size document.
- Map Scanning : This includes scanning of A0-A2 size papers.
- Book Scanning : This includes book or binded papers scanning.
- Photograph Scanning : This includes old Card photograph scanning.
- VHS / Audio Cassette Conversion : This includes conversion of VHS / Audio cassette content in computer readable form.

Over a period, we have been serving various sectors like Government / Semi Government Organizations, Banks, Corporates, Libraries, Domain Specific Organization, Professionals like Ca, Lawyers and Businesses.

We look forward to an opportunity to be of service to you in a performance-based model which is measurable.
